Whenever working together on a project with Mass Excavation or trying to support their efforts, it is obvious they have an intent for a great working relationship with their customers, vendors, and other contractors. Safety is paramount to Mass Excavation; they take the time to ensure the jobsite is safe, and their work is completed safely without sacrificing efficiency. From the boots on the ground, to their operators and drivers in the equipment, all the way to up to management – the care and effort put into every aspect of their execution can be seen and felt working together. Thank you Mass X for being a great customer, team player, & all around awesome crew to work with!
