

**NC MACHINERY**

February 25<sup>th</sup>, 2022

To whom this may concern:

Mass Excavation is leading the industry in equipment management and preventive maintenance. Their dedication to preventive maintenance tracking and timeliness of repairs leads to a fleet of equipment that is always in good working order. On top of the quality of their fleet, the management team at Mass X is also exceptional. I have personally dealt with the Mass X crew for over 10 years, and in my experience they are always very responsive and reasonable and make good, educated repair decisions that also better the longevity of their equipment. In all, Mass X is a great company to conduct business with.
